

# Leading enterprise in photovoltaic power station energy storage

## Overview

---

CATL has secured a dominant position in the PVBL 2025 Global Photovoltaic Brand Ranking of the Energy Storage Top 20, leveraging its expertise in the research and development (R&D) and manufacturing of power batteries and energy storage systems. The International Energy Agency (IEA) says batteries will make up 90% of the sixfold increase in global energy storage capacity through 2030, while 1,500GW is estimated to be available by the end of the decade. This growth is led by falling costs, innovations in technology, and favorable policies. As the world races toward net-zero emissions, Battery Energy Storage Systems (BESS) stand as the linchpin for integrating renewables into stable, resilient grids. Below, we spotlight 10 companies innovating.
