

Leading stocks of solar power generation companies

Overview

In this article, we cover nine of the best solar stocks to buy in 2025, all listed on major U.S. exchanges. We aim to give you a clear, beginner-friendly view of each company, why it qualifies, and what the risks are. If you're a believer in the future of solar power and can look past the recent volatility from rising energy prices, Forbes Advisor would like to share with you what we believe are among the best solar power stocks to consider right now. Our editors are committed to bringing you independent ratings. The solar energy industry builds and installs devices to capture energy from the sun and convert it into electric power. Includes current stock prices, market capitalizations, analyst recommendations, earnings calendar, and the latest news. With the levelized cost of energy for utility-scale solar down around \$30 to \$60 per megawatt-hour, solar remains one of the least expensive energy sources. Despite the elimination of many federal tax incentives, solar companies are experiencing a period of growth following incentives provided by the Inflation Reduction Act of 2022, which allows taxpayers to subtract 30% of the cost of solar power from their taxes through 2032.
