Overview

Standard residential solar panels measure 66 inches by 40 inches, or a little over 5 feet long and 3 feet wide. Each panel therefore takes up around 18 square feet. Standard Residential Panels Optimize Space and Handling: The industry-standard 60-cell panel dimensions (65" × 39" × 1. That's basically a 66×39 solar panel. The length and width of solar panels can vary widely, and size determines the number of panels that can fit on a roof and the system's overall energy output.
