

Light passenger car equipped with solar power generation system

Overview

The car equipped with a solar generator on its roof is the Lightyear 0. This vehicle emphasizes sustainability through its ability to harness solar energy efficiently, boasting a remarkable range and minimal environmental impact, which is increasingly critical amid climate concerns. We're on a mission to bring clean mobility to the world by developing scalable cutting-edge solar charging systems. By harnessing the power of the sun, our technology contributes to a more sustainable future and reduces dependence on traditional energy sources. The following ten vehicles feature solar panels, enabling them to gain range simply by. Some makers have also innovated with electric cars by integrating solar cells into the body to contribute a little bit of power to the battery in a green way.

Light passenger car equipped with solar power generation system

Aptera Motors

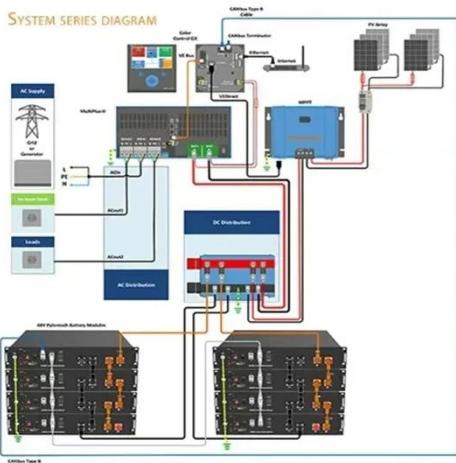

Harness the power of the sun with Aptera. Designed with ~700 watts of integrated solar cells, drive up to 40 miles per day completely off the grid and enjoy 400 miles of range per full charge.
