

Light steel photovoltaic support equipment manufacturers

Overview

The metal structures offered by us are ideal for photovoltaic panels (solar panels), and because they are made of light steel profiles designed and manufactured with high precision, the assembly becomes easy and fast. Product design is based on industry best practices, with a strong R&D component, seeking cost-optimized and efficient customized solutions. At Welser Profile and Origami Solar partner up for the future of solar energy. Our steel profiles are renowned for consistently displaying the tightest tolerances around straightness, twist and camber. Combined with optimal material selection and the highest corrosion resistance, Welser profiles offer. Sino East Steel Group, a leading manufacturer of support structures brackets products, professional produces high quality panel mounting structure for PV project, such as c purlin steel, galvanized z channel steel, omega profile, I profile, square steel tubing, h beam, etc. Our range includes Solar Mounting Profiles, Laser-Cut Parts, and various metal works.
