

# Lithium battery charging outside the cabinet

## Overview

---

Some manufacturers add power sockets to safety cabinets to make them suitable for charging batteries. A battery fire generates an intense internal blaze with extreme heat and smoke. Made with a proprietary 9-layer ChargeGuard™ system that helps minimize potential losses from fire, smoke, and explosions caused by Lithium batteries. A fireproof battery charging cabinet is designed to address these risks by combining fire resistance, separation, monitoring capability, and controlled charging conditions. This article explores why fireproof battery charging cabinets are essential, what risks they are designed to mitigate, and how. Where can you safely charge your lithium-ion (bike) batteries?

And why is a safety cabinet – also known as a flammable storage cabinet – not the safest option?

In this blog, we explain how to charge your batteries in a reliable and safe way, and why choosing a certified battery safe is the right. CellBlock Battery Storage Cabinets are a superior solution for the safe storage of lithium-ion batteries and devices containing them. Securall understands the critical risks associated with modern energy storage.
