

Lithium battery won the bid for energy storage company

Overview

LEOCH wins a world-class telecom infrastructure provider's bid to supply advanced lithium energy storage solutions with high safety, AI-driven monitoring, and green manufacturing for telecom & data centers. Recently, Narada Power won the bid for the centralized procurement project of energy storage batteries of China Electric Equipment Group, with a total capacity of 990MWh. The winning of this project will further consolidate the company's dominant position in the energy storage business. Initiated in 2024 and finalized in February 2025, this achievement reinforces LEOCH's leadership in the core protection of telecom infrastructure with its independently. The procurement exercise has attracted 67 battery energy storage companies but only six have emerged as winners. The average bid stood at CNY 0. Narada Power will provide energy storage systems for the company's American projects. As global demand for renewable energy integration surges, lithium energy storage project bidding has become a critical process for developers, contractors, and investors. This article explores actionable strategies, market trends, and practical examples to help stakeholders succeed in competitive.
