

Longi photovoltaic panel production base

Overview

The manufacturing base will be located in Deltamas, West Java Province, Indonesia, and will adopt HPBC 2.0 composite passivation back contact battery technology developed by Longi Green Energy. It is expected to start production line construction preparation work in June 2025. LONGi has 8 main production facilities in China: Yunnan, Ningxia, Jiangsu, Shaanxi, Zhejiang, Anhui, Qinghai and Shanxi, with the Yunnan and Ningxia facilities being the largest. The milestone was celebrated during Shanghai Climate. Building upon its "Lighthouse Factory" intelligent manufacturing framework, LONGi's Jiaxing Production Base further advanced its zero-carbon transformation in 2024. By leveraging digital tools to enable low-carbon production, deploying rooftop photovoltaic power stations, procuring green. Longi is the world's leading solar manufacturer, consistently making Top-10 solar brands. With manufacturing facilities and sales offices in more than 150 countries and regions worldwide, including Asia, America, Australia, and the Middle East, Longi has established a strong reputation for its. Top clean energy equipment supplier Longi Green Energy Technology Co. (LONGi), the world's largest solar PV manufacturer headquarters in Xi'an, China has announced that its Jiaxing Production Base has been recognized by the World Economic Forum (WEF) as a Global Lighthouse Factory, the world's first solar module manufacturing.

Longi photovoltaic panel production base

LONGi Sets Global Benchmark with First Zero-Carbon PV Lighthouse

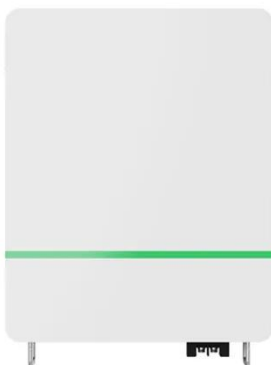

In a landmark achievement for sustainable manufacturing, LONGi's Jiaxing Production Base has become the world's first facility in the photovoltaic (PV) industry to earn dual recognition as both a ...
