

Madagascar yellow solar panel manufacturer

12.8V 200Ah

Overview

The Ambatolampy solar photovoltaic plant is operated by GreenYellow Madagascar. GuarantCo's first guarantee in Madagascar supports and crowds in local bank debt funding for the operational Ambatolampy solar plant developed by Green Yellow, a 20MW solar power plant which was the first grid connected solar plant in the country. The credit enhancement will also enable GreenYellow. Madagascar has one of the world's most favorable climates for solar energy, with an average solar irradiation of nearly 2,800 kWh per square meter annually. Yet, the country faces a striking paradox: its electricity access rate is among the lowest in the world. The manufacturers listed on our website supply wholesale solar panels that can help you cut down on your buying cost and provide you with the scope to earn more revenues.
