

# Make your own solar power using cement

## Overview

---

In this video, we reveal the simple recipe and step-by-step process for creating sturdy concrete blocks specifically designed to support solar panels. Learn the exact ratio of materials needed and follow along as we demonstrate each stage of the construction process. more Ever wondered. Photovoltaic concrete is a new kind of concrete that generates its own electricity by converting light to energy. The concrete panels are built with ultra thin solar panels that are conveniently. Have you finally decided to build your home a DIY solar panel?

These DIY solar panel tutorials might finally help you get on with this project! This summer's extreme heat will definitely have you finally building a DIY Solar Panel. Hi there, we're Jonathan & Ashley from Tiny Shiny Home. Our family of 6 spent many years traveling full-time in our renovated vintage Airstream. So to get started, I searched around and found a few videos here and there, and a few articles on how to go about building a solar panel, but it was hard for me to find a full free video or article that showed you the full process to making a solar panel from scratch.
