

Maldives balcony solar power generation system

Overview

Announced on J, this ambitious project aims to significantly reduce the resort's dependence on diesel generators by providing clean, sustainable energy through three 74-meter diameter solar rings. With a 2 MWp floating solar PV plant and a 3 MWh battery storage system, the Soneva Secret resort project will result in 900,000 to 1,000,000 liters of diesel savings per year, leading to 2,000 plus tons of CO2 emissions reduction. Project Solar City will be the largest energy project in the Maldives. The agenda of the mission was to meet the implementing agency and to confirm the reasons for the delay in project implementation.
