

Maldives energy storage battery custom manufacturer

Overview

The government of Maldives today signed agreements with three Chinese companies to develop battery energy storage systems in 18 islands of the country. The agreement was signed at a ceremony held at the Ministry of Environment on Monday morning. The initiative, backed by the Asian Development Bank (ADB), is an advanced battery storage and energy management system that will enhance renewable energy penetration in small island countries like the Maldives. The agenda of the mission was to meet the implementing agency and to confirm the reasons for the delay in project implementation. Under the Accelerating Sustainable System Development Using Renewable Energy (ASSURE) project, supported by the Asian Development Bank (ADB), the Maldives is seeking contractors for the installation of 6 MWh capacity Flow Battery Energy Storage Systems (BESS) with Energy Management Systems (EMS) on. The Government of Maldives has awarded a contract to a Chinese consortium to install 38 megawatts (MW) of battery energy storage systems (BESS) across 18 islands, in a bid to enhance renewable energy capacity and reduce dependence on fossil fuels.
