

# Materials required for the installation of photovoltaic panels

## Overview

---

These include the photovoltaic (PV) modules or solar panels, mounting hardware and racking systems for attaching the solar array to your roof or ground, AC/DC disconnects for safely isolating the PV system from electrical power sources, wiring for connecting components. These include the photovoltaic (PV) modules or solar panels, mounting hardware and racking systems for attaching the solar array to your roof or ground, AC/DC disconnects for safely isolating the PV system from electrical power sources, wiring for connecting components. The Renewable Energy Ready Home (RERH) specifications were developed by the U. Environmental Protection Agency (EPA) to assist builders in designing and constructing homes equipped with a set of features that make the installation of solar energy systems after the completion of the home's. Solar panels can be installed differently depending on the users' needs. The installation of solar panels can be done over the roofs. For installing the. Below are the basic and general components and devices which needed for a solar panel system installation at home. Solar panel also known as Solar Cell or Photo Voltaic Cell is the backbone of solar power system.
