

Microgrid Configuration List

LiFePO₄

Wide temp: -20°C to 55°C

Easy to expand

Floor mount&wall mount

Intelligent BMS

Cycle Life:≥6000

Warranty :10 years

Overview

Here's a photo of the low voltage microgrid configuration we currently have running for code development and testing at NI headquarters in Austin, with each microgrid control node numbered, a list of parts for each node, and links to download the code for each node. Microgrids have been proposed as a solution to the growing deterioration of traditional electrical power systems and the energy transition towards renewable sources. During the design of an microgrid (MG), the components and physical arrangement must be considered to achieve a proper transition. Sandia National Laboratories is a multimission laboratory managed and operated by National Technology & Engineering Solutions of Sandia, LLC, a wholly owned subsidiary of Honeywell International Inc., utilities, developers, aggregators, and campuses/installations).
