

Microgrid NEEQ

Overview

A microgrid serving roughly 5,000 people in Calistoga, Napa County, California. The distribution-level microgrid infrastructure is owned by utility,, and is powered by the Calistoga Resiliency Center facility. The facility is a commercial-scale project coupling a lithium-ion (BESS) with onsite and hydrogen fuel cells to power Calistoga for up to 48 hours.

Microgrid NEEQ

Microgrid Overview

Microgrids that incorporate renewable energy resources can have environmental benefits in terms of reduced greenhouse gas emissions and air pollutants. In some cases, microgrids can sell power back to the grid ...

Grid Deployment Office U.S. Department of Energy

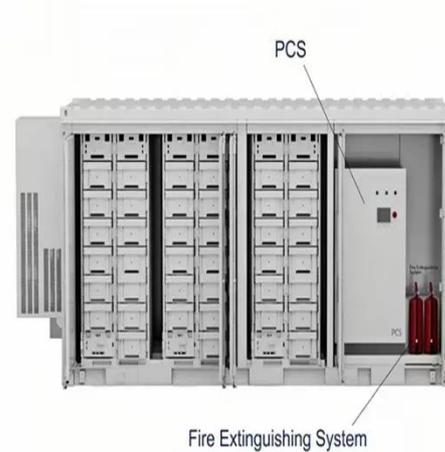

In terms of microgrid design, this means that the microgrid does not have to be built to serve power 24/7, but instead can be built to provide power during times the main electric grid experiences an outage or is ...
