

Mobile Photovoltaic Cell Cabinet for Water Plants

Overview

The Mobile Solar PV Container is a portable, containerized solar power system designed for easy transportation and deployment. It integrates advanced photovoltaic modules, inverters, and electrical cabinets into a compact and functional unit. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Ideal for remote areas, emergency power supply, and. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced container. MOBIPOWER containers are purpose-built for projects where energy demands go beyond what a trailer can deliver. These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells — with optional diesel redundancy when regulatory or client. Designed to minimize the impact on the environment and and available from 5,5 kW (one 12 panels unit) to several MW, our revolutionary high quality and high wind-resistant solution allows Sunstream to transport and install in a record time and without any civil works a solar power plant in kit.

Mobile Photovoltaic Cell Cabinet for Water Plants

Mobile Container PV Module Cabinet

Light PV module and aluminum guide rail, motor assisted drive module laying, easy to unfold, flexible installation. One trained worker can complete the site deployment in 30 minutes. Mobile PV solar ...
