

# **Name of the testing agency for photovoltaic brackets**

## Overview

---

NOA is an advanced provider of testing services for photovoltaic and wind power components and parts. It has the ISO 17025 laboratory accreditation qualification issued by China CNAS, and the ISO 17020 inspection and testing agency accreditation qualification. As a global leader in applied safety science, UL Solutions helps our customers navigate compliance complexity and mitigate risks for their solar products. Intertek is your comprehensive source for all PV module testing and certification needs. What is photovoltaic (PV) module testing and certification?

Solar photovoltaics (PV) have become a disruptive force in the energy sector, changing the way we use energy. The PV industry is constantly evolving, which. In recent years, the demand for photovoltaic and wind power products in European countries, the United States and Asian markets has shown a growing trend, which has brought good development opportunities for photovoltaic and wind power industries; However, the continuous improvement of the quality. Manufacturers, suppliers and importers of photovoltaic (PV) components including connectors, junction boxes, cables and inverters must make absolutely sure that their products are tested and certified according to national and international expectations defined by established directives and. Photovoltaic (PV) module certification from SGS – PV module testing and certification to ensure that your modules comply with international standards.
