

# Nepal capacitor energy storage project

## Overview

---

The project will be one of Nepal's biggest storage-type projects, with an estimated annual energy generation capacity of 587.7 GWh for the first 10 years and 489. During the dry season, the project can generate energy for six hours daily. The \$505 million 140MW Tanahu hydropower project has reached 63 percent of the physical progress. This installation will. Can a geospatial model predict energy storage capacity across the Nepal Himalayas?

In this study, we configured a geospatial model to identify the potential of PSH across the Nepal Himalayas under multiple configurations by pairing lakes, hydropower projects, rivers, and available flat terrain, and. Nepal has made remarkable progress in expanding electricity generation capacity from 50 MW to 3,500 MW in 60 years. However, much of the 3,500 MW is. Hydropower constitutes 95% of installed capacity but can't store monsoon surplus for winter use. This energy rollercoaster costs Nepal 2.3% annual GDP growth according to World Bank estimates. 2 billion national program approved last month to. Gham Power together with its partners Practical Action and Swanbarton have officially been awarded a project by United Nations Industrial Development Organization (UNIDO) to install one of the largest energy storage systems in Nepal, with a total battery capacity of 4MWh.
