

# New Energy Battery Energy Storage Photovoltaic Stocks

## Overview

---

Amid this backdrop, you may consider adding core clean energy stocks like Canadian Solar CSIQ, First Solar FSLR, JinkoSolar JKS and Vestas Wind Systems VWDRY to your portfolio to reap the benefits of the booming renewable energy and energy storage space. Most notable for green energy advocates is the September expiration of federal credits on electric vehicles (EVs) and a tighter 2027 deadline for solar energy projects. The revolution of EVs is far from dead, however. To this end, it is imperative. Evidently, the International Energy Agency (“IEA”) predicted global renewable power capacity to double between 2015 and 2030, increasing by 4,600 GW, in its October 2025 report. MarketBeat previews the top five stocks to own by February 1st. If you're investing in renewable energy stocks, you'll want to find the sweet spot. You don't want to keep investing. Led by a massive \$1.5 billion facility for Aypa Power, a series of new deals for Jupiter Power and PowerBank show that lenders are doubling down on battery energy storage system assets. Across three major transactions in early 2026, at least \$2 billion in financing was recently announced. Discover 10 Battery Storage Startups to Watch in 2026 and their cutting-edge solutions! From utility-scale BESS and second-life EV batteries to non-flammable lithium systems and solid-state designs, these innovators are powering the grid of the future. 20 Frameworks, Startup Intelligence & More!.
