

New energy photovoltaic panel film manufacturer

Overview

We design and manufacture custom solar cells, panels, and power solutions using proprietary thin-film or high-efficiency crystalline PV technology. These films serve various functions such as: Common PV film types include ethylene vinyl acetate (EVA). Shanghai JINSUN New Energy Technology Co. has registered capital of USD20 million, with first phase investment of USD55 million. is officially authorized by 3M to distribute 3M brand solar encapsulant films globally. For almost five years, Shanghai Ever-Thriving has been one of the leading suppliers of solar encapsulation applications for many big module manufacturers. We develop high-quality custom solar solutions for IoT, transportation. Our lightweight, flexible and powerful solar technology provides the design versatility that makes integration with a variety of applications simple — thus offering a powerful and aesthetic solution to meet the challenges of growing markets.

New energy photovoltaic panel film manufacturer

PowerFilm Solar

PowerFilm designs and manufactures custom solar cells, panels, and power solutions for energy harvesting, portable, and remote power applications using proprietary thin-film or high-efficiency ...
