

New energy storage project in Skopje

Overview

New independent energy storage project in Skopje. By the year 2024, Ai Stratis will become the first energy-independent island thanks to an innovative electricity production and storage. North Macedonia's capital just made history. A city where sudden power outages become as rare as unicorn sightings, and solar panels work overtime even after sunset. The \$5 billion. Operational since Q2 2024, this €1. But here's the kicker - it's achieving 82% round-trip efficiency, outperforming even the Swiss Nant de Drance facility's 80% benchmark [8]. North Macedonia's solar. The Skopje phase change energy storage project aims to fix this energy storage dilemma through thermal banking technology that's 40% more efficient than lithium-ion batteries. The rated storage capacity of the project is 600,000kWh. GEN-I Skopje, a subsidiary of Slovenia-based GEN-I, won the right to build it in 2019, at a tender for a 50-year lease of state-owned land.

New energy storage project in Skopje

Construction of the skopje energy storage photovoltaic project

As the photovoltaic (PV) industry continues to evolve, advancements in Skopje energy storage power station planning have become critical to optimizing the utilization of renewable energy
