

Non-standard solar photovoltaic panel bracket

Overview

Installers use specialized brackets and tile hooks that fit between tiles without breaking or cutting. These systems distribute weight evenly and are weather-sealed for long-term durability. This kit accommodates various sizes and supports mounting up to four solar panels side by side. You'll appreciate its quick installation process, height. Check each product page for other buying options. Find the perfect fit for your RV, boat, or off-grid power needs. Non-standard roofs, which account for over 35% of global rooftops in solar-ready markets, include a wide variety of materials and designs: Standard racking systems aren't always compatible with these roof types. Using them can lead to structural damage, roof leakage, and even reduced solar panel. Secure your solar panels with durable, easy-to-install solar panel mounts.
