

Nordic Photovoltaic Folding Container Corrosion-Resistant Type

Overview

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no shading from a remaining container structure. Huijue Group newly launched a folding photovoltaic container, the latest containerized solar power product, with dozens of folding solar panels, aimed at solar power generation, with a capacity for mobility to provide green energy all over the world. The Solar PV container is a mobile, plug-and-play. It has a light and versatile substructure. The semi-automatic electric drive unit manoeuvres the mobile photovoltaic system into its operating position rapidly and is equipped with suitable energy storage systems. The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container.

Nordic Photovoltaic Folding Container Corrosion-Resistant Type

solarfold , Mobile Solar Container

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ...
