

# Off-grid cost of energy storage cabinets at Indian airports

## Overview

---

Recent pricing trends show standard 20ft containers (500kWh-1MWh) starting at \$180,000 and 40ft containers (1MWh-2.5MWh) from \$350,000, with flexible financing including lease-to-own and energy-as-a-service models available. Ola Electric has begun deliveries of its Ola Shakti 9.1kWh residential battery energy storage system in Bengaluru, marking the country's first BESS solution powered by 4680 Bharat cells. The company also secured BIS certification for its 3kW/5.2kWh configuration, enabling sales of both variants. In alignment with India's commitment to achieving net-zero carbon emissions by 2070, the aviation sector has set an ambitious goal of attaining net-zero emissions at airports by 2050. This vision is being actively supported through initiatives such as the promotion of Sustainable Aviation Fuel. Here, we conduct a review of grid-scale energy storage technologies, their technical specifications, current costs and cost projections, supply chain availability, scalability potential, and policy frameworks focused on the Indian market and contextualized in the global landscape.

**Introduction.** This study, through comprehensive grid simulations, examines key aspects of energy storage in India, including required capacity, optimal locations, duration, technologies, costs, and policy framework, to meet growing electricity needs in a least-cost manner, while preventing the stranding of. The 2020 Cost and Performance Assessment provided installed costs for six energy storage technologies: lithium-ion (Li-ion) batteries, lead-acid batteries, vanadium redox flow batteries, pumped storage hydro, compressed-air energy storage, and hydrogen energy storage. 8 lacs/MW/month and solar+storage bids at 3.
