

# Off-grid energy storage container

## Overview

---

An Off Grid Container is a modular, transportable unit designed to operate independently from public utilities. It typically includes integrated solar panels, battery storage systems, inverters, and sometimes backup diesel generators. Each container is equipped with a photovoltaic array, a battery bank, and a generator — all custom-sized to meet the specific needs of the customer. With integrated. MOBIPOWER containers are purpose-built for projects where energy demands go beyond what a trailer can deliver.
