Whether you live in a remote village or want to make your home self-sustainable, this complete guide on the off grid solar system in India will help you understand its working, costs, components, pros & cons, and whether it's the right fit for your energy needs

Introduction: What is an Off-Grid. Discover everything about off grid solar systems in India - from prices, components, battery backup, benefits, and top providers in 2025. 5 lakh (₹2,050,000) before subsidies. After applying central subsidies (₹78,000), the net price drops to around ₹19. Subsidy usually does not apply to off-grid setups. Besides, maintaining off-grid solar systems takes more effort (and money) because batteries are involved and they have to be replaced periodically to keep the system functioning properly.
