

Off-grid solar container DC power supply for Dutch base stations

Overview

It integrates solar PV, battery storage, backup diesel, and telecom power distribution in one standard container. Strong storage: Up to 50 kWh capacity. The Off Grid Container also transports the solar PV panels and mountings, the only part of the product which has to be assembled at the customer's site. The on-site installation is undertaken by the Off-Grid Installer team and after all clients are included in the online remote monitoring service. Highjoule's HJ-SG Series Solar Container was built for one purpose: keeping base stations running where there's no grid power. Green energy input: Supports solar, wind. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. An Off Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres. Born from years of solar expertise at Danger Electric. As global demand for stable electricity in remote areas (islands, mining sites, bases) surges, traditional diesel generators—plagued by high fuel costs (0.40/kWh) and significant carbon emissions (over 1,000 tons of CO₂ annually)—are being phased out, while grid-tied systems remain constrained.

Off-grid solar container DC power supply for Dutch base stations

Instant Off-Grid(TM) Shipping Containers with Solar and Batteries and AC+

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.
