

Outdoor portable static power source recommendation

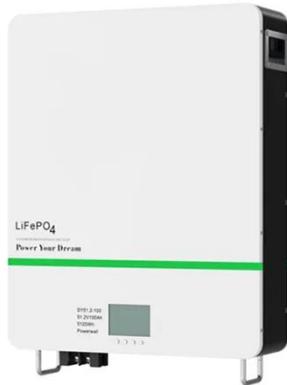

Overview

We tested 30 portable power stations over 12 camping trips. While 300-400Wh is enough for basic camping needs, we chose higher capacity units for several reasons. Higher capacity allows longer trips without recharging. And, thanks to advances in lithium-ion battery technology, they're also lighter and more compact. Whether you've been dreaming of van life or are building out your emergency kit in advance of that next blackout, there is. We tested out over 40 compact power stations to find out which ones will keep the lights on during blackouts even when you're off the grid. When you purchase through links on our site, we may earn an affiliate commission.

EcoFlow Delta 3 Plus Best on a budget 2. And, unlike gas generators, power stations don't emit potentially lethal carbon monoxide fumes and can be recharged with optional solar.
