

Philippines large-scale energy storage power generation project

Overview

Meralco Terra Solar was announced as the biggest project in the world to combine solar PV and battery storage when it was proposed in 2022 by Prime Infrastructure Holdings (Prime Infra) and developer Solar Philippines. Aboitiz Power disclosed that its joint venture, SN Aboitiz Power (SNAP) — formed with Norway-based renewable energy company Scatec — has reached "financial close" for two new BESS projects with a combined capacity of 80 megawatts (MW). The projects comprise a 40-MW battery energy storage facility. The power generation arm of the Philippines' largest private electric distribution provider, Manila Electric Company (Meralco), is developing its second large-scale battery storage project. Photo courtesy of MGEN Meralco PowerGen Corp. Formally titled, SN Aboitiz Power (SNAP) has reached financial close for two new battery energy storage system projects in Benguet, marking another step in the company's push to scale flexible capacity as the Luzon grid grapples with rising renewable energy penetration.
