

Photovoltaic bracket comes with self-cleaning

Overview

Easy Installation: Simply clean the PV module surface, affix the water clips to the bottom without tilting, ensuring no mud areas. Using a photovoltaic panel protection mat prevents debris from entering the panel glass. **Durable Material:** Constructed from high-quality plastic and polymer material, these clips offer anti-aging properties and resistance to extreme. The invention discloses a photovoltaic panel bracket with a self-cleaning function and a use method thereof, and relates to the technical field of photovoltaic panel installation. The device comprises a supporting frame, wherein a supporting seat is fixedly arranged on the top surface of the. Tianjin Wenli New Energy Technology Co., abbreviated as "Tianjin Wenli", was established in 2012 and is located in the Daqiuzhuang Industrial Development Zone, a steel base in Tianjin. It covers an area of 46,000 square meters and has a construction area of 35,000 square meters. Solar electric power can be made available continuously for consistent on-off grid applications. It is environmentally friendly as well. Due to the arc in the framed PV panel, rainwater tends to accumulate near the frame during rainfall.

Photovoltaic bracket comes with self-cleaning

What are the inspection items for a photovoltaic bracket during

During the cleaning process, it's important to remove any debris that has accumulated on or around the PV brackets. Leaves, twigs, dirt, and bird droppings can not only make the installation look ...
