

# Photovoltaic combiner box five-core cable model

## Overview

---

The IQ Combiner 5C HDK consolidates interconnection equipment into a single enclosure and streamlines IQ Series Microinverters and IQ Gateway installation by providing a consistent, pre-wired solution for residential applications. It uses control cable wiring for communication and is compatible. Our DC combiner boxes offer users the possibility to integrate short-circuit and overvoltage protection, as well string monitoring solutions (I,V, T and SPD and switch isolator status), for PV systems using central inverters with PV panels in trackers and fix tilt systems. It will combine the same solar panels which in series to form a PV Array, supporting the use of solar pump inverter, so as to constitute a complete photovoltaic pump system \* Each PV array attached to DC fuse. The Renogy 5 Strings Solar Combiner Box is the ideal solution to combine inputs from up to 5 strings of solar panels into a single output. It accepts up to five 1P miniature circuit breakers and one 2P surge protective device for improved safety of the solar system. This guide explains how combiner boxes work, how they have evolved.
