

# Photovoltaic container 500kW compared to battery

## Overview

---

When choosing a 500 kW / 1075 kWh containerized energy storage system, you need to consider your application scenarios, equipment performance, system security, scalability, vendor reputation, and many other factors. MEGATRON 300 & 500kW Battery Energy Storage Systems are AC Coupled BESS systems offered in both the 10 and 20' containers. Designed with either on-grid (grid following) or hybrid (grid forming) PCS units, each BESS unit is capable of AC coupling to new or existing PV systems making them an ideal. It features a three-level battery management system that ensures robust protection against overcharging, over-discharging, and over-voltage. The modular design enables easy expansion and front maintenance, while a built-in local monitoring EMS allows for remote oversight. BESS are shipped with all the components pre-installed in the factory for quicker and easier site installation (shipped using UN 3536 standards). Customizable design to meet different customer needs.
