

# Photovoltaic panel completion data list

## Overview

---

Open PV Project: This dataset provides information on the installed photovoltaic (PV) systems in the United States. The data can be downloaded from the United States Large-Scale Solar Photovoltaic Database (USPVDB) which provides the locations and array boundaries of U.S. photovoltaic (PV) facilities with capacity of 1 megawatt or more. The data is collected by NREL. Roof has 10 or more years useful life remaining (if roof-mounted). Solar installers, system integrators, and sellers can use our advanced technical filters to find the exact PV panels that match their needs. View all of NREL's solar-related data and tools, including more PV-related resources, or a selected PV Performance.

## Photovoltaic panel completion data list

---

### Major Solar Projects List

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated monthly.
