

Photovoltaic panel factory trademark registration

Overview

While you don't have to register your business with the federal government, it's wise to register or trademark your company name if you plan on doing business outside your state in the future. What is a trademark?

PAC members review the policies, goals, performance, budget, and user fees of patent and trademark operations, advising the The USPTO. A registered trademark for solar panels identifies a brand or product related to the solar energy sector, distinguishing it from competitors. Prominent examples include "SunPower," "Tesla Solar," and "Canadian Solar," which underline the distinctiveness and innovation within the market. Trademarks are divided into two main categories and 45 classes, each class having separate goods and services. Goods relating to the generation and storage of electricity from solar energy are classified in Class 9.
