

Photovoltaic panel pallet loading

Overview

Following these instructions, you can fit roughly 850 panels or 34 pallets/ truck for residential, and roughly 750 panels or 30 pallets/truck for utility. Using nylon or steel bands, strap the modules to the pallet. They help installers and warehouse teams safely store, move, and handle solar panels—from delivery and warehouse storage to. Always insert the fork from the short side of the pallet, as long as it is safe to do so. Materials you will need to properly stack and load your recycled PV panels for loading the truck.

Photovoltaic panel pallet loading

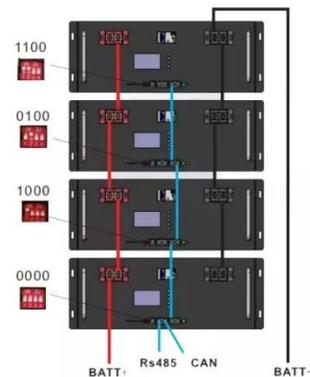

Reusable Solar Panel Pallets , Safe Storage, Handling & Transport

Unlike traditional wood pallets and single-use packaging, PVpallet pallets provide consistent support and load stability during warehouse storage, transport, and jobsite handling. The result is less breakage, ...
