

# Photovoltaic panel racks that track the sun

## Overview

---

A solar tracking system (also called a sun tracker or sun tracking system) maximizes your solar system's electricity production by moving your panels to follow the sun throughout the day, optimizing the angle at which your panels receive solar radiation. Since 1980, more than 19,000 Zomeworks single axis trackers have been installed, in different climates, on nearly every continent in the world. Solar tracking systems do come with a high price tag. Is the extra solar power output you're getting worth the additional cost of a solar tracker?

In most cases. Solar panel mounting and tracking systems come in a variety of different options and work to make your solar panel array as effective and efficient as possible. Ideally, in order to ensure your panels are receiving as much sunlight as possible, sunlight must be perpendicular to your panels.

Note: The light sensor only. The sTracker is a high efficiency, low maintenance, ground mount dual axis solar tracking system.

## What Is A Solar Tracker And Is It Worth The Investment?

What Is A Solar Tracker?How Much Does A Solar Tracker Cost?Are Solar Trackers Worth The Additional Investment?To Track Or Not to Track?A solar tracker is a device that follows the sun as it moves across the sky. When solar trackers are coupled with solar panels, the panels can follow the path of the sun and produce more renewable energy for you to use. Solar trackers are usually paired with ground-mount solar systems, but recently, rooftop-mounted trackers have come onto th...See more on solarreviews Images of Photovoltaic Panel Racks That Track The SunSolar Panel Racking SystemSolar Panel RackingSolar Panel Rack DesignSolar Panel Rack SystemsRacking System For Solar PanelsBest Solar Panel Racking SystemSolar Racking SystemRack For Solar PanelsSolar RackingSolar Panel Sun Tracking Solar Tracking System Mounting Rack for Single Advantages and disadvantages of a sun tracker systemSolar Tracking Installations , Solar Sun Tracker , Tick Tock Energy 4kw Sun Tracking Mount System Solar Panel
