

Photovoltaic panel string welding machine is customized on demand

Overview

The automatic photovoltaic string welding machine, with its flexible compatibility, can adapt to the welding of solar cells of various specifications, meeting the customized needs of the distributed photovoltaic market. In the industrial chain of solar photovoltaic power generation systems, the automatic photovoltaic string welding machine occupies a crucial position. As module. Tabber Stringer is used to weld solar cells to strings; Solar cell stringer machine OCH1500 adopts IR soldering method, servo motor driving and industrial ccd positioning & detection for defective solar cell excluding automatically. An error occurred while retrieving sharing information. The equipment adopts various advanced automation technology Inquiry NOW Will reply within 2 hours! How. available on the market (from 166mm to 210 mm),full and half cut.

Photovoltaic panel string welding machine is customized on demand

SOLAR/PV EQUIPMENT - Semiphoton

Our automated Solar/PV modules production line includes a complete set of equipment, such as solar cells laser cutting, string soldering, welding, glass loading, layup, laminating, framing, J-Box ...

What are the brands of photovoltaic panel string welding machines

Supplier of solar panel making machine, Photovoltaic module equipment manufacturing factory from China
Customized solutions for solar panel production lines from 5MW to 1GW
Supply ...

Flexible Automatic Shingled

Stringer for Customizable Solar Panel

Automatic shingled stringer is an automatic equipment to weld the solar cells into strings by curing the conductive adhesive and collect the welded strings (or transfer them directly to the later process).
