

# Photovoltaic panels are not used after installation

## Overview

---

No, solar panels don't start working immediately after installation. It requires utility approval and a few steps before they can be switched on and begin powering your home. Solar panels are generally low-maintenance, but. Solar panels are incredibly low maintenance and if they're installed correctly, they are unlikely to stop working unexpectedly. The solar panel installation process isn't a quick week-long or even month-long process. One can continue reaping their immense power-saving and clean energy benefits for the next 20 to 30 years. Just like any other home appliance, solar.
