

Photovoltaic panels are now being installed and workers are being recruited

Overview

Residential solar, which is mostly rooftop systems, added about 9,500 jobs due to the rising popularity and availability of state and federal incentives. The recent Solar Futures Study from the U.S. This would require significant growth in the current solar workforce. In order to develop a well-trained, equitable, and inclusive. Solar photovoltaic (PV) installers assemble, set up, and maintain rooftop or other systems that convert sunlight into energy.

Aging workforce: Some experienced installers are retiring, and not enough new people are coming in to take their place. **Skilled labor gap:** Installing solar panels isn't just physical labor—it requires technical. As the demand for solar energy skyrockets across the United States, solar jobs are now among some of the fastest-growing professions. These jobs were in all 50 states.
