

# Photovoltaic panels are placed directly on the floor

## Overview

---

Ground-mounted solar panels are photovoltaic systems installed directly on the ground rather than on rooftops. These systems are supported by metal frames or pole structures anchored into the earth, allowing for customizable tilt and orientation. Choose appropriate solar panels, 3. Prepare the floor structure, 4. On top of being an alternative to rooftop solar, ground-mounted solar systems can be used on farms, in your garden, and more! In this article, we'll explain what a. Turkey's largest solar manufacturer, Ankara Solar, recently came out with a line of walkable solar panels, which have a durable non-slip glass surface, that can be installed in floors and open areas both inside and out. They're usually more expensive than roof-mounted systems, but can maximize your renewable energy production. Ground-mounted solar panels offer a powerful alternative that can deliver higher energy yields, easier maintenance, and long-term flexibility.
