

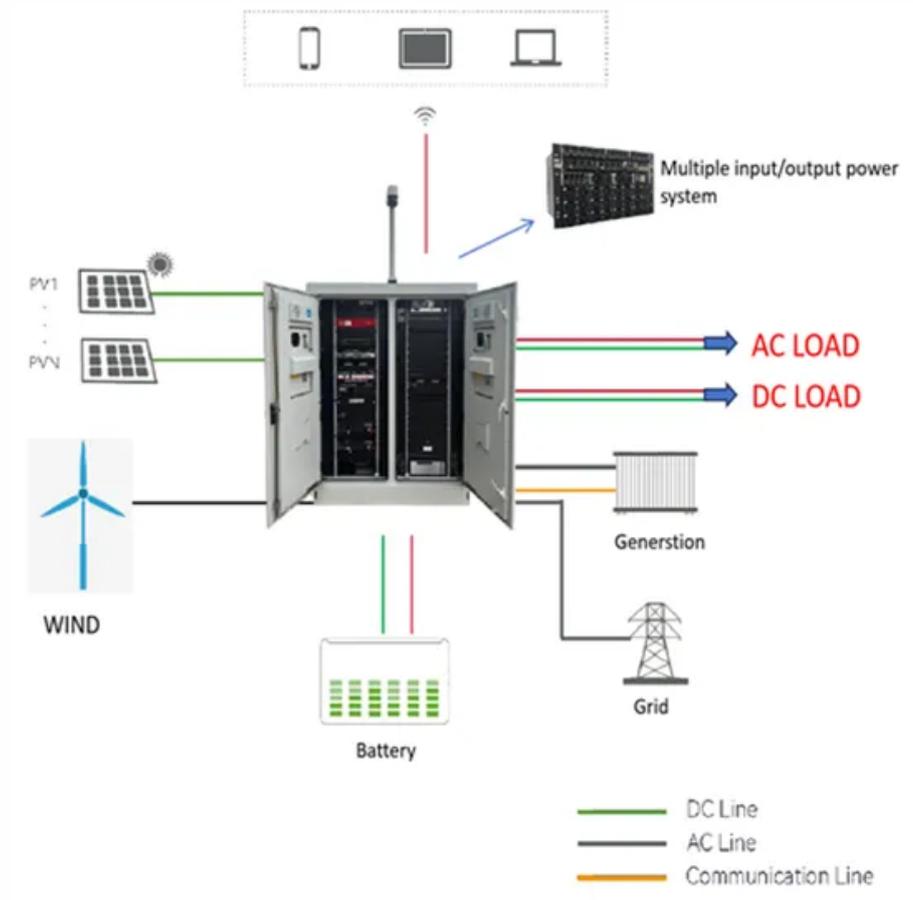

Photovoltaic panels flipped to celebrate the founding of the party

Overview

The solar plant in Dunhuang, southwest of China, demonstrated a dancing show to celebrate the 100th anniversary of the founding of the Communist Party of Chi. solar market became a multibillion-dollar sector over the past decade, there was a small but mighty tribe of solar first-adopters who took the initial steps in commercializing photovoltaic (PV) technology in the 1970s, '80s and '90s. The history of solar energy is an American success story. Since. The afternoon light glinting off clusters of floating solar panels. Neighbors guiding visitors through homes warmed by heat pumps, battery storage systems glowing on walls. These sound like scenes from a clean energy expo or a hopeful science fiction novel, but they're neither. The word "Photovoltaic" takes us to the beginning of solar history: "Photo" meaning light.
