

# Photovoltaic roof support cost

## Overview

---

In most cases, the cost of the fundamental mounting hardware will range between \$1 and \$2 for every watt that the system produces. The cost of installation can range anywhere from \$3 to \$5 per watt when a more advanced system, such as a tracking system, is being put in. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. 30 per watt in 2025, representing a 60% decrease from 2010 levels. Combined with the 30% federal tax credit extended through 2032, most homeowners can achieve payback periods of 6-12 years with 25+. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. Solar shingles typically cost more than solar panels. Residential rooftop PV solar panels cost per watt installed has been dropping and newer technology is enabling a far greater efficiency - that's more solar energy converted into electricity for home usage - for less money. Your options for buying, leasing, Purchasing Power Agreements (PPA, see. The average cost of solar roof system is \$49,700, but the cost typically varies from \$40,000 and \$60,000.
