

# Photovoltaic support structure of color steel house

LIQUID/AIR COOLING

ON GRID/HYBRID

PROTECTION IP54/IP55

BATTERY /6000 CYCLES

## Overview

---

A kind of photovoltaic support structure for color steel roofing comprising color steel tile fixed seat, supporting beam, connecting plate, fixing bolt and C-shaped bricketting. The top surface of color steel tile fixed seat is formed with a fixed plate for being equipped with screw. A kind of photovoltaic support structure for color steel roofing comprising color steel tile fixed seat, supporting beam, connecting plate, fixing bolt and C-shaped bricketting. The top surface of color steel tile fixed seat is formed with a fixed plate for being equipped with screw. To successfully install solar energy systems on the rooftops of color steel houses, several key considerations and steps must be addressed. Understand roof compatibility with solar panels, 2. Follow local. Here are the 10 most popular steel structure types for PV panel projects: Each Steel Structure for PV Panel project offers unique features, advantages, and ideal applications. The table below highlights recent global installation statistics for these mounting systems.
