

# Physical solar generator DIY

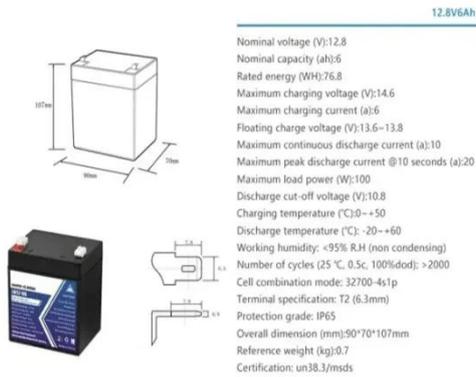

## Overview

---

How to DIY a Solar Power Generator: In this Instructable, you'll learn how to build your own DIY solar power generator using basic components like a solar panel, battery, inverter, and charge controller. Then all the relevant input and output sockets are wired and mounted on the outside of the case where they are easily accessible. A great thing about solar energy is that it can come in all sizes for all types of applications. The panel collects sunlight, the charge controller manages the flow of power to the battery, and the inverter turns that stored power into electricity you can actually use. A well-designed DIY solar generator system, when constructed following legal DIY solar guidelines, can power essential household appliances while significantly reducing your carbon footprint. Sorry, an unexpected error has occurred. In my case, I made my own battery.
