

Power outage automatically switches to solar power generation

Overview

SMA and Enphase are two companies that make special solar inverters that are designed to automatically disconnect from the grid in the event of an outage, while still providing power to your home from your solar panels. electrical code requires rapid shutdown of a solar system to protect emergency workers and prevent dangerous backfeed current from passing onto distribution lines. To keep your power on in a blackout, you need a solar inverter that can remove your home from the grid, along with. While solar panels can generate power during an outage, whether that energy reaches your home depends entirely on your system's design. It senses the outage and shifts to backup power with no manual steps. Most grid-tied systems automatically shut down unless paired with a battery backup.

Power outage automatically switches to solar power generation

Automatic Transfer Switch: Never Lose Power Again!

It senses the outage and shifts to backup power with no manual steps. It prevents backfeed to utility lines and coordinates the main service, the inverter, and your loads. With ...
