

# PowerChina Vietnam invests in energy storage power station project

## Overview

---

The three parties will leverage cross-border synergies to invest in and develop an energy project cluster with a total scale of 6 GW, covering three major sectors: offshore wind power, green hydrogen and green ammonia, and zero-carbon industrial parks, setting a new benchmark. The three parties will leverage cross-border synergies to invest in and develop an energy project cluster with a total scale of 6 GW, covering three major sectors: offshore wind power, green hydrogen and green ammonia, and zero-carbon industrial parks, setting a new benchmark. BEIJING, Ap/PRNewswire/ -- With the successful full-capacity connection of the Huong Linh 3 and Huong Linh 4 wind power projects with power grid, POWERCHINA has achieved another milestone in Vietnam's renewable energy sector. With a total installed capacity of 60 MW, the projects can. Recent reports from Vietnam News Agency and Saigon Times have highlighted POWERCHINA's significant contributions in advancing Vietnam's sustainable development through green energy projects. These achievements exemplify the joint efforts of China and Vietnam, highlighting their in-depth cooperation. Recently, Mingyang Group Chairman Zhang Chuanwei, Xuan Cau Group (XCE Energy is its subsidiary) Chairman Su Yong, and PowerChina International Asia Pacific General Manager Zhou Jiayi met at Mingyang's global headquarters, reaching a strategic cooperation consensus and finalising a major layout for. With the global spotlight on renewable energy, China and Vietnam – two dynamic neighboring economies in Asia – have been forging strong ties in the realm of new energy.
