

# Price of 20-foot Smart Photovoltaic Energy Storage Container for Wastewater Treatment Plants

## Overview

---

The energy storage system is essentially a straightforward plug-and-play system which consists of a lithium LiFePO4 battery pack, a lithium solar charge controller, and an inverter for the voltage requested. Price is \$387,400 each (for 500KWH Bank) plus freight shipping from China. The battery core adopts lithium iron phosphate battery-LFP 48173170E, the capacity is 120Ah, the nominal voltage is 3.2V, the working voltage range is 2.8V-3.6V, located in Wuxi, Jiangsu, is a high-tech enterprise mainly engaged in new energy photovoltaic power generation and energy storage business. 20 Foot Electric Supplementary Energy Storage. 20 Foot Electric Supplementary Energy Storage Containerluxury. Take the difficulty out of large-scale reverse osmosis plants with containerized water treatment systems. By choosing pre-designed, module-sized plants, fully assembled in standard 20-ft and 40-ft containers with the option for a 10-ft as well, the complexity and construction of building water. LZY's photovoltaic power plant is designed to maximize ease of operation. It not only transports the PV equipment, but can also be deployed on site. Due to its construction, our solar. Power ranges span from 20KW to over 400KWh and are housed in standard 8ft to 40ft containers depending on application needs. Who can benefit from customized energy systems?

Custom systems are ideal for remote villages, off-grid farms, telecom base stations, industrial parks, disaster relief.
