

# Price of new high-power photovoltaic panels

## Overview

---

5 kW solar system, you'll spend anywhere from \$16,600 to \$20,500 before accounting for tax credits or rebates. Solar panels cost between \$2. Department of. This guide will brief you on what is the actual photovoltaic panels price in 2025 for households or business uses. It is the combination of both hard and soft costs. Global estimates are used before 2010; European market benchmarks thereafter due to limited data availability. Solar photovoltaic module prices refer to the cost of the solar panel itself, and do not include installation or other system. Photovoltaic (PV) solar panels, the sleek installations you see on rooftops from California to North Carolina, are no longer niche or experimental. They're mainstream, and for many households, they're one of the smartest long-term investments you can make.
