Overview

When the sun is shining, PV systems can generate electricity to directly power devices such as water pumps or supply electric power grids. This is known as net metering or feed-in tariffs, and it allows homeowners to earn credits on their electricity bill for the excess energy their solar panels generate. At Rise Energy, we understand that solar energy is an. A photovoltaic (PV) cell, commonly called a solar cell, is a nonmechanical device that converts sunlight directly into electricity. Sunlight is composed of photons, or particles of solar energy. Generac Solar & Battery Solutions deliver the.

Provide electricity to the power company through solar power

Solar energy

Solar cell panels also are used to provide electric power in many remote terrestrial locations where conventional electric power sources are either unavailable or prohibitively expensive ...

Going Solar with Your Utility: What You Need to Know (2026)

When you install home solar, it's typically a grid-tied solar system, meaning the solar panels on your roof will work with your utility to power your home 24/7. You usually don't go completely off-grid. Here's ...

GRADE A BATTERY

LiFePO4 battery will not burn when overcharged, over discharged, overcurrent or short circuited and can withstand high temperatures without decomposition.

Can You Sell Solar Energy Back to the Power Company? - Rise Energy

At Rise Energy, we understand that solar energy is an investment in your home and your future. That's why we offer comprehensive solar solutions that include not only installation but also ...

Home Energy Storage (Stackble system)

High Efficiency

Easy installation

Safe and Reliable

Perfect Compatibility

Product Introduction

-  Scalable from 10kWh to 50 kWh
-  Self-Consumption Optimization
-  Integrated with inverter to avoid the compatibility problem
-  LFP battery, safest and long cycle life
-  Stackable design, effortless installation
-  Capable of High-Powered
-  Emergency Backup and Off-Grid Function

Photovoltaics and electricity

When the sun is shining, PV systems can generate electricity to directly power devices such as water pumps or supply electric power grids. PV systems can also charge a battery to provide ...
