

# Relion lifepo4 positive and negative

## Overview

---

In this case, the positive terminals are connected together and the negative terminals are connected together of all the batteries until you reach your desired capacity. The positive of. Prismatic cells with lithium iron phosphate chemistry (LiFePO<sub>4</sub>) come in many shapes and forms, but a popular size is of around 100 amp/hours with a voltage of 3. However, as with any electronics, safety measures should always be taken. RELiON has always placed safety the highest priority in all their lithium battery products. This manual only applies to RELiON Lithium Batteries.
